## **High-Rise Apartment and Condominium Fire Safety**

Fires in high-rise and condominium buildings are especially dangerous. Make sure you know where all the exit stairs are in your building. If you do have a fire in your building, here are steps you can take to stay safe.

Know how to escape in an emergency:

If you cannot get out of your apartment because of fire, smoke or if you have a disability:

**STUFF** wet towels or sheets around the door and vents to keep smoke out.

**LEAVE** your apartment. Close the door behind you.

CALL 911 and tell them where you are. It may take a while for the fire department to clear the building. Stay on the phone with the fire department to help them locate you.

**OPEN** a window slightly and place a bright cloth outside to signal your location. Close the window so the air does not pull smoke into your room.

**GO** to your outside meeting place and stay there. Call the fire department. If someone is trapped in the building, let the fire department know.

fire department.
